BACKGROUND DETAILS

This coffee is part of a customer request for a regional coffee with good notes. Our request fell in Santander that has given us outstanding coffee for a long time.

Biodiversity is heritage for humanity. This is the philosophy of coffee growers in south Santander, Colombia. This being our best-selling coffee was in the first container that Single Origin and EPA Balvara exported together. For 2024-2025 harvest we had to request the "Cooperativa de Caficultores de Santander" San Gil Branch for a lot of coffee with the specifications of our Santander coffee.

This is the result with the same notes and freshness your customers are used to.
