

JAVA ORGANIC KAYUMAS TAMAN DADAR WET HULLED - GRAINPRO

Notes: GRAPEFRUIT, PEAT, HERBACEOUS, CACAO NIB

ORIGIN INFORMATION

Grower	Producers from Curah Tatal & Kayumas villages located on the Ijen Plateau in Eastern Java,
Variety	Typica
Region	Curah Tatal & Kayumas villages, East Java, Indonesia
Harvest	May - September
Altitude	900 – 1600 meters
Soil	Volcanic loam
Process	Wet hulled and dried in the sun
Certifications	Organic.

BACKGROUND DETAILS

This coffee is sourced from family-owned farms located near the villages of Curah Tatal and Kayumas on the island of Java, Indonesia. In the 17th Century Java coffee was first cultivated in low lying areas, but by the late 19th Century coffee leaf rust had destroyed production, forcing new coffee cultivation into the highlands where high altitudes and volcanic soil provide perfect growing conditions. Smallholder organic coffee production is atypical of the region which is dominated by large government run coffee estates established by the Dutch in the 18th century. Taman Dadar, meaning flower garden, aptly describes the way smallholder coffee is cultivated, colorfully inter-cropped with parkia beans, avocados, erythrina, albizia, and leucaena trees, which produce food for local consumption and shade. Java Taman Dadar is wet-hulled, a uniquely Indonesian processing method in which the coffee parchment is removed before the final drying is completed, producing a hallmark Indonesian flavor.
